

This catalogue presents the best and most comprehensive range of products, aesthetic features and solutions for sound, intercommunication and public address system installations, backed by **EGi's** guarantee of more than 30 years of experience in the market.

EGi has a Customer Service and Technical-Commercial Assistance Service which gives assessment, advice and carry out projects helping you to choose the best solution for each installation.

1973

With headquarters in Spain and 5 branch offices nationwide including Madrid and Barcelona, EGI is continuously strengthening its international presence with branches in Portugal and Singapore

1994

EGi began as a small family business in Zaragoza and was founded by its current chairman, Mr Sánchez Pérez

Sound & Lighting

DOMOS2
Audio y Domótica

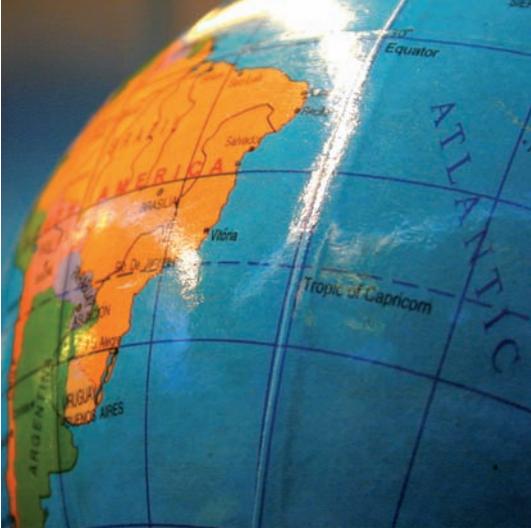

EGi has been awarded ISO 9001:2000 certification for its commitment to quality, Pilot Award for Logistics Excellence 2004, and Best Telecommunications Company in the self-governing region of Aragon, Spain

EGi participates in national and international exhibitions

20

EGi headquarters are strategically located in Zaragoza with direct access to the road network and cover an area of about 5.300 m², housing more than 150 employees

«escenic»

2001

New factory and warehouse building for the lighting division. This new building with an area of 5.000 m² is located in Centrovía, one of the largest industrial parks in Zaragoza

Audio Domotics Public Address Intercom Lighting

EGi offers a wide range of products including multiroom audio, intercom and public address systems for commercial, public and private installations

- Multiroom audio, intercom and domotic systems for residential use
- Nurse-call systems for hospitals and elderly care centres
- Sound, intercom and public address systems for public and commercial installations
- Loudspeakers and acoustic diffusers
- Sound and lighting, all in one device

* EGi branch office in Barcelona

* EGi branch office in Madrid

* EGi headquarters in Zaragoza

EGi provides custom-made solutions to fit customers' needs

With over 30 years of experience in the design and manufacture of sound equipments, EGi has been awarded several quality certifications such as ISO 9001:2000 certification, Pilot Award for Logistics Excellence 2004, and Best Telecommunications Company in the self-governing region of Aragon, Spain.

At the present time, EGi has built a large commercial network by opening new branch offices throughout Spain and it is strengthening its international presence thanks to the Export Department's growth.

Quality

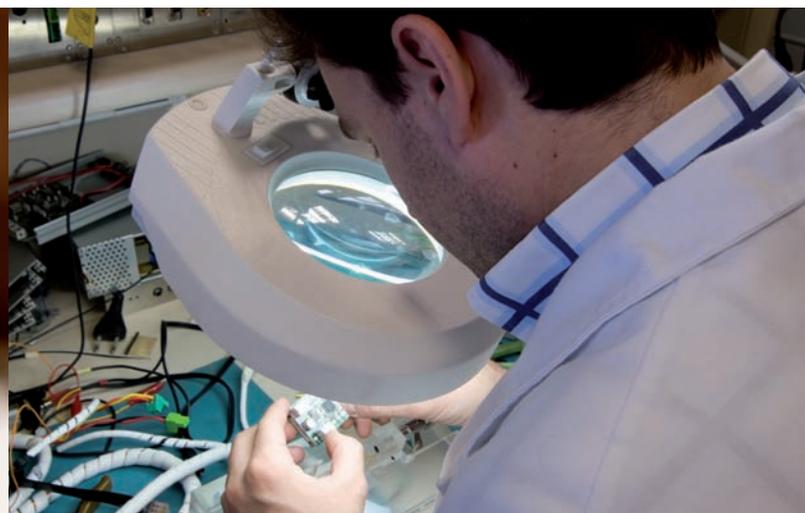

EGi awarded the ISO 9001:2000 certificate in 2003. The ISO Quality Control System is applied to all processes, including design, manufacture and after-sales service of electronic sound equipments for residential, commercial and public applications.

Its strong international presence since 1994 and the ISO 9001 certificate are confirmation of "EGi's commitment to quality". EGi has enlarged and renewed its product range in relation to the expectations of its customers, who already know the company's commitment to quality.

Commercial network

EGi has more than 40 professionals working in Spain and branch offices in Madrid, Barcelona, Seville, Bilbao, Lisbon and Singapore. EGi provides customer service and technical assistance for project consulting and technical support of customers.

This catalogue includes the widest range of products, features and solutions to public address and sound system installations, based on more than 30 years of market experience.

**Shaping a prosperous future together.
Increasing R&D investment and developing
new future-oriented projects with the latest
technology.**

International presence

EGi has a strong international presence with distribution networks in more than 60 countries throughout Europe, Middle East, Asia, Australia and America.

EGi markets its products through a world-wide distribution network with experienced personnel providing pre-sales consulting and post-sales technical support.

Millennium is a new product concept, which provides sound and communication solutions for small, medium-size and large public and private installations.

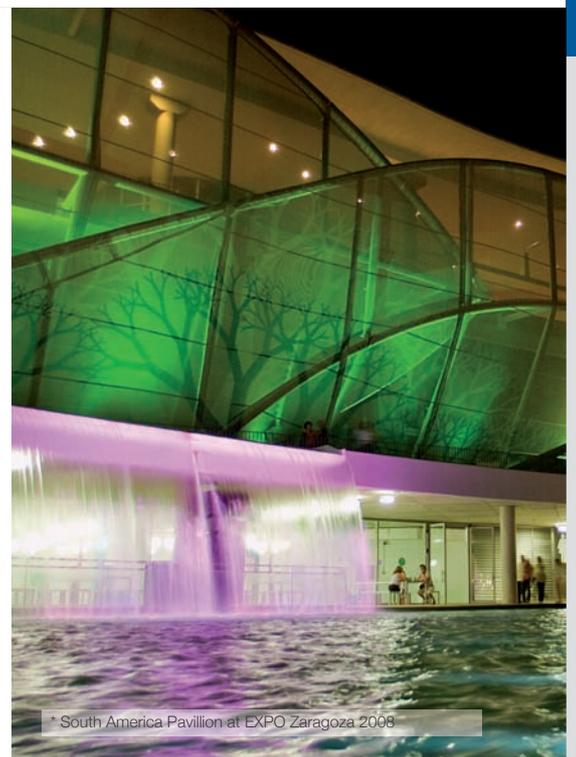

Millennium combines the wealth of features, flexibility, ease of use and installation of EGi decentralised systems (such as Domos system) with the simplicity of 100 V public address systems.

Millennium allows combined installations to be set up, in which, depending on customer's needs, a choice of several separate music programmes can be combined for each room, zone or area (offices, meeting rooms, industrial buildings, hypermarkets...) with the transmission of messages from traditional microphone consoles or, taking advantage of the telephone exchange, from any telephone terminal connected to the system.

Welcome to **Millennium**, EGi's general purpose solution for sound, communication and public address systems in all types of public and private installations.

* El Trovador Business Centre, Zaragoza

* South America Pavilion at EXPO Zaragoza 2009

Features

- Microprocessor-based public address system with message broadcast and background music.
- Up to 4 audio channels with volume adjustment per zone or locally.
- Message broadcast in up to 127 zones.
- Playing of pre-recorded messages for commercial, publicity or security applications.
- Wide range of diffusers for both indoor and outdoor applications.

Solutions to small and medium-size installations

such as shops, bars,
supermarkets, gyms,
restaurants, pharmacies,
small businesses, etc.

Millennium 2 + 1 zones

Public address system with message broadcast and background music designed for **small and medium-size installations** such as shops, supermarkets, bars, restaurants, pharmacies, travel agencies, franchise shops, etc.

This version allows control of message broadcast for 3 zones (2+1 zones) and 2 audio channels. The system is made up of 3 main units: audio processor with FM tuner to manage the system, control console to control the message broadcast and background music distribution, and autoamplified control units to select and adjust the music channels locally. A wide range of acoustic diffusers is available for providing background music and message broadcast.

Features

- 2+1 zones for message broadcast.
- Intercom.
- Up to 2 audio programmes.
- FM tuner.
- Local connection of a microphone or an audio source.
- Audio local adjustment.
- Message priority system.
- Door bell and door-opener.

Audio processor

1301.1 Audio processor is the main module of the installation and has been designed for in-wall mounting. It has 2 amplifiers (20W / 10W) and a 15 V $\overline{\text{=}}$ line output to connect the autoamplified control units. It also includes door-opener, FM tuner, and RCA connectors to connect the external audio source.

1301.1

2 + 1 Zone audio processor with FM tuner

- 3-Zone audio processor for commercial sound installations.
- It includes a (10 + 10 W) / 20 W mono/stereo amplifier for zone 1 and another 10 W mono amplifier for zone 2, as well as a 15 V $\overline{\text{=}}$ line output to connect control units.
- Messages with din-don tone and door bell in the 3 zones.
- Double door-opener (12 V \sim signal).
- White casing.
- FM tuner.
- An external audio source can be connected.

Technical specifications

Power supply 230 V \sim

Maximum consumption 50 W

Voltage output 15 V $\overline{\text{=}}$ for general line power supply

Zone 1 power 20 W; min. line impedance 4 Ω

Zone 2 power 10 W; min. line impedance 8 Ω

General line Up to 1 A of rated current (maximum 1.5 A)

Antenna External socket 75 Ω (only 1301.1)

Related Products

- Flush or surface mounting boxes to house the audio processor. Please consult page 31.

1701

1702

Control console

The control console is the device which controls the functions of the installation. It allows the simultaneous control and adjustment of some functions at zone or area level by means of local modules/controls.

1201.11

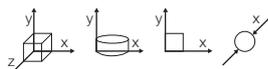

Control console 2 + 1 zones with 2" loudspeaker

- Built-in microphone, loudspeaker, keyboard and display.
- It controls music, messages, door-opener and door bell for sound installations of up to 3 zones based on 1301.1 modules.
- Menu operation with the help of a 2 line - 16 character display.
- 2", 32 Ω loudspeaker for answering messages and unidirectional gooseneck microphone.

Related products

Metallic bracket (ref 002254) to fit 1202.11 and 1202 control consoles on wall.

Control units

1204.12

1204.10

Compatible with switchgear units from any manufacturer

Related products

- Accessories for standard box (ø 60 mm). EGi 1-gang front trims. Please consult page 30.

1204.12 / 1204.10

2-Channel control unit
5 W RMS, 1-8 loudspeakers. Message override.

- 2-Channel control unit. 5 W RMS power to connect from 1 to 8 loudspeakers.
- Digital volume with 80 1dB steps with loudness.
- Recognises number of channels in the installation and adapts its selector to them.
- Message override.
- For use in Millennium (stage 1) general line.

Technical specifications

Power supply 15 V_{DC} through general line
Maximum consumption 8,1 W
RMS power output 5 W
Minimum load impedance 16 Ω per output

Features

Control and local amplification of sound in areas of installations with or without message broadcast. It can drive amplifiers to obtain more power.

1203.12

1203.10

Compatible with switchgear units from any manufacturer

Related products

- Accessories for standard box (ø 60 mm). EGi 1-gang front trims. Please consult page 30.

1203.12 / 1203.10

2-Zone amplified intercom unit.

- Intercom, 2 zones with 2 x 1.5 W RMS amplifier, separate volume adjustment for each zone and lock key to leave zone 2 activated.
- Possibility for internal or external microphone.

Technical specifications

Power supply 15 V_{DC} through general line
Maximum consumption 3 W
RMS power output 1,5 W per zone
Input for pushbutton 0 V_{DC} , 15 V_{DC} exterior
Minimum load impedance 16 Ω per output

Features

Intercom systems in commercial establishments, fast-food restaurants, offices, etc.

Amplifiers and power supply units

1307.1
15 V $\overline{\text{---}}$, 20 W power supply unit

- 15 V $\overline{\text{---}}$, 20 W power supply unit with short-circuit and reverse polarity protections.
- It can be parallel-connected to other units.

Features

- 1307.1. Additional power supply module for all types of installations.

1309.1
20 W Amplifier

- 20 W (4 Ω) / 10 + 10 W (2 Ω) Amplifier.
- With 3 mixed audio inputs, plus a fourth input with priority over the others.

Features

Amplifier module to increase the power in any area.

Technical specifications	1307.1	1309.1
Power supply	230 V~	230 V~
Maximum consumption	35 W	35 W
RMS power output	-	20 W
Minimum load impedance	-	4 Ω
Maximum consumption	1,2 A at 15,5 V $\overline{\text{---}}$	from 0.1 to 1.2 A depending on the audio power consumption

Example of installation in a restaurant

- 3 Zones with message broadcast: bar (ZONE 1), kitchen (ZONE 2), dining rooms 1, 2, 3 (ZONE 3) - General line
- 2-Channel control units installed in dining rooms 1, 2, 3
- 1 or 2 audio channels
- Messages may be addressed independently to each zone (bar/kitchen/dining rooms) with din-don tone
- Output for external audio source provided in the dining room
- Intercom maître-kitchen
- Emergency evacuation

PRODUCTS

1301.1
2 + 1 Zones audio processor with FM tuner.

G28N/32
2" Ceiling loudspeaker + spring fixing grille. Wideband. 32 Ω.

G14A/16
5" Ceiling loudspeaker. Wideband. 16 Ω.

1201.11
Control Console 2+1 zones with built-in speaker and flexible mic.

Example of installation in a shop

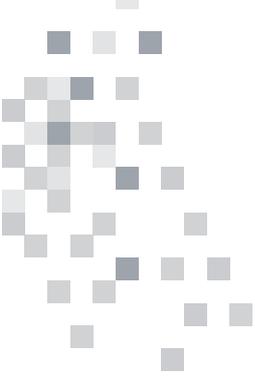

- 2 Zones: shop (ZONE 1) and changing room + toilet (ZONE 2)
- 1 or 2 audio channels
- Door bell may be listened through the loudspeakers in either one or both of the zones
- Electric door-opener

Solutions to large installations

such as hotels
elderly care centres
business centres
football stadiums, congress halls
hospitals, health centres
sports facilities, museums
shopping centres, etc

Millennium 127 zones

Millenium-Pro for 127 zones is a public address and background music system for broadcasting music and messages to each zone. It allows to send messages manually, automatically or by phone, having priority over the music.

This system is made up of a central unit or audio processor managed through a digital CPU, several audio/signal processing modules, and one or more control consoles to manage message broadcast and background music distribution, different power amplifiers and control units to select between the 4 audio channels and control them locally. A wide offer of acoustic diffusers is available in order to listen to the music and messages.

Features

- Up to 4 adjustable audio channels at any point in the installation.
- Playing of pre-recorded messages for commercial, publicity or security applications.
- Transmission of public address calls from any conventional telephone or from a control console up to 127 zones.
- Intercommunication.
- Local connection of microphones, wireless microphones or audio sources with message priority for assembly halls, meeting rooms, lecture rooms or any other private or public installation.
- Control and amplification of background sound (with or without messages) by rooms, zones or areas.
- PC-control of the whole installation.
- Flexible system easily enlargeable.

Control Software

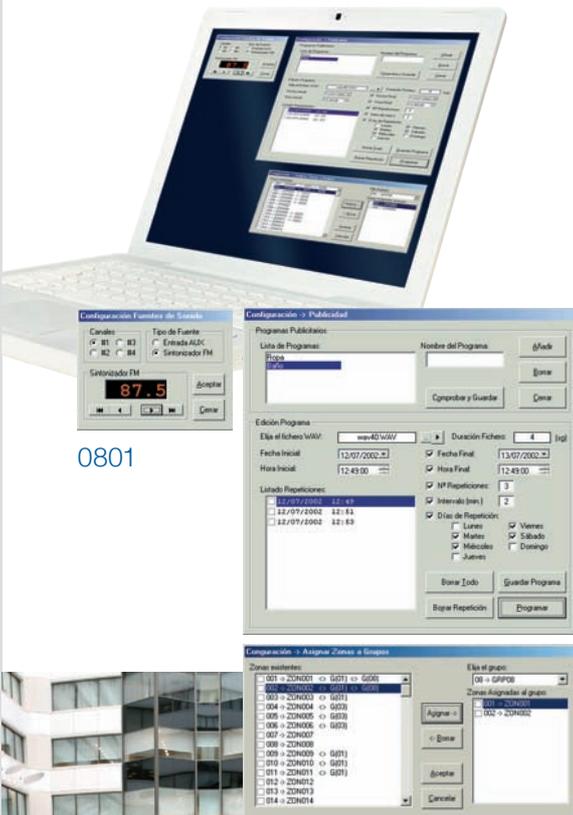

0801

PC Control software for installations up to 127 zones.

- PC Control software for audio installations of up to 127 zones.
- Language selection from a choice of Spanish, English, French, Portuguese, German and Italian.
- In addition to other specific functions it controls the same functions as the EGi ref 1202 Control console.
- It can be installed up to 127 PCs in the same installation.
- It can be combined in the same installation with EGi ref 1202 control consoles, totalling a maximum of 127 control points.
- It can be handled by means of easy Windows® type menus.
- It includes, amongst others, a main screen which allows the state of functions to be displayed in real time as well as parts of the installation controlled by the 0801 software or the control consoles.
- Names and number of zones and groups can be entered using the keyboard and mouse. Once they have been entered the keyboard can be disconnected from the system and only the mouse is needed.
- Message can be recorded and played back thanks to the desktop interface-console with a microphone which is included in this reference.
- It includes an option which allows advertising messages to be recorded and played and/or WAV voice/music files, which can be programmed and sent at a specified time to the groups/zones required. This option must be used in combination with the PC sound card.
- Item of ref 0801 includes:

Console - interface

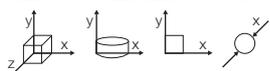

0801

- The software in CD format with instructions for its installation and the minimum hardware requirements for correct operation.
- An interface-console which establishes communication between the Millennium installation and the PC and allows the recording and/or playing of messages from the control station. It includes a RJ45 female connector inside and 3 direct, fixed DB9 type cables, a 3.5 mm stereo jack for microphone and a 3.5 mm mono jack. It also includes monitor-loudspeaker inside. In combination with ref. EGi 1501.xx connection base and with ref. EGi 1207 4-channel control, the interface-console acts as a message and music zone, allowing these to be heard through the monitor-loudspeaker.
- Telephone cable with two RJ45 male connectors at the ends, to connect the interface-console to the Millennium installation.

• PC and software requirements:

- PC: minimum Pentium 200 MHz with 30 Mb RAM.
- Operating system, Windows 95© or higher.
- Standard peripheral connections at common ports "COM1" or "COM2", with DB9 type connectors.
- Minimum hard disk space: 50 Mb.
- Standard conventional sound card, with "Audio OUT" output and "MIC-IN" input by means of 3.5 mm stereo female jack connectors.

Control console

The control console is the device which controls the installation functions. It allows the simultaneous control and adjustment of some functions at zone or area level by means of local modules/controls. In the case of the 1202 version, up to 127 zones can be controlled.

1202 Control console for 127 zones

- Control console for 127 zones with built-in microphone, keyboard and display.
- It controls music, messages and features such as volume, equalization and automatic messages in each zone or group of zones, individually or globally, for sound installations of up to 127 zones.
- With 2", 32 Ω loudspeaker for answering messages.
- Menu operation with the help of a 4 line - 16 character display.
- It allows to program the whole system.

Related products

- Metallic bracket (ref 002254) to fit 1202.11 and 1202 control consoles on wall

Connection base

1501.12

1501.10

1501.12 / 1501.10 Connection base for control console/audio source

- Connection base to connect 1201.x / 1202 control consoles and audio sources far away from the audio processor.
- With RCA audio input to connect an external music source to the sound installation.
- Signal presence indicating lamp.

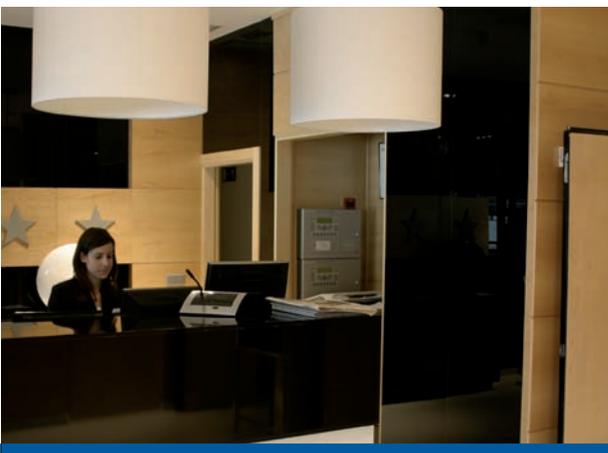

Technical specifications

Power supply 15 V $\overline{\text{---}}$ through general line

Maximum consumption 1,2 W

Input impedance 20 K Ω

Input sensitivity 370 mV

Audio processor in 19" rack format

Audio processor made up of modular CARDS designed for surface or 19" RACK mounting.

All the modules are built with stainless steel fronts and are housed in EGi supports ref. 1709 or 1707 for placing on tabletop or in cabinet, both under the 19" rack standard with 3 UA (Height Units). 7, 14, 21 or 28 UP (Width Units) according to the modules.

This mechanical format makes it easier to mount the processor and to combine it with elements of conventional 100 V public address systems.

Central processor - Main modules

1315 120 W Power supply unit

- It includes a 120 W power supply unit for 15 V $\overline{=}$. It takes 28 Ups.
- It can feed 7 x 20 W, 15 V $\overline{=}$ amplifiers.
- Stainless steel front.
- 230 V \sim front main switch.
- Front LED indicators displaying: ON (green), 15 V $\overline{=}$ power supply working correctly (green), overload/short-circuit (red) and ventilation due to temperature (red).
- 1 Rear 230 V \sim IEC input.
- 7 Rear connectors polarized for 15 V $\overline{=}$ supply.

1316 System central processing unit CPU

- It controls the installation and, amongst other functions, memorises the number and name assigned to zones or groups in a zone; it controls the operation of the modules included in the processor and the functions that depend on them and initialises the Millennium installation each time it receives power.
- Front RJ45 socket for the 1202 control console.
- Front LED indicators displaying: ON / OFF (green) and condition of wires 9 and 90.
- Rear 15 V $\overline{=}$ power connector.
- Rear 14-way male flat cable connector for the audio programs + intercom bus.
- 15 Rear plug-in strips.
- Rear 20-way male flat cable connector for the audio source bus.
- Rear plug-in terminal connector for the 9-file general bus (not balanced) or 14-file general bus (balanced).
- Only one module allowed per installation.

Related products

- Chassis for installation of Millennium modules. in 19" rack (3 UA x 84 UP). Please consult page 31.

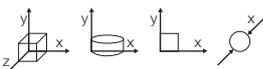

- 19" Tabletop cabinet with bumpers and external stainless steel finishing. Please consult page 31.

- 7 UP blind cover for Millennium 1707 chassis or 1709 tabletop cabinet. Please consult page 31.

* UA: Height Units. UP: Width Units.

Optional units for central processor modules

1101.1

RCA Modular audio input with compressor.

- RCA modular audio input with compressor to connect an external audio source to the sound installation.
- Front yellow LEDs to indicate the activation of line outputs and green LED to indicate the ON/OFF status.
- Rear connectors for stereo audio input (2 RCA pairs) and for audio programs + intercom bus (20-way ribbon wire socket).
- It provides 1 or 2 audio channels to the installation.

1102.1

Modular FM digital tuner

- Modular FM digital tuner as an internal music source in the sound installation.
- Front LED to indicate the line output activation, front LED to indicate the operation of the FM tuner, front LED to indicate the RCA input status and front LED to indicate the ON/OFF status.
- Pair of rear RCA stereo connectors for input of external music source.
- Rear connectors for stereo audio input (2 RCA pairs) and for audio programs + intercom bus (20 way ribbon wire socket).
- Rear female connector for RF antenna.
- Rear potentiometer to adjust antenna reception sensitivity.

1103.1

Message recorder/player with digital control

- Modular pre-recorded message player with message capacity (it stores up to 8 messages of 15 seconds each).
- Front red LED to indicate message recording and front green LED to indicate the ON status.
- Front RCA connector for input of message audio signals.
- 14-Way ribbon wire socket for connection to audio transmission bus.
- 4 Rear plug-in strips for detection of events, whose triggering activates the transmission of a pre-recorded message to the selected zone.

1104.1X

Telephone message module with digital control

- Telephone message module, which allows public address system messages to be broadcasted by zones from any multi-frequency telephone.
- Front green LED to indicate the ON/OFF status and front yellow LED to indicate off-hook status.
- 14-Way ribbon wire socket for connection to audio transmission bus.
- 2 Rear plug-in strips to connect telephone line.
- This module comes in 7 different languages:

1104.10 Spanish	1104.11 English	1104.12 Portuguese	1104.13 French
1104.14 Italian	1104.15 German	1104.16 Czech	

Features

Access to the PA system through any telephone.

1109

Telephone extension adapter

- 1109 Adapter allows the telephone extension to be connected to an amplifier.
- When the telephone extension - that is connected to the 1109 module - receives a call, it connects the call directly to the amplifier.
- This is a standalone module. It can work independently of the Millennium installation using 1309.1 / 1304.1 amplifiers.

Technical specifications	1101.1	1102.2	1103.1	1104.10	1109
Power supply	15 V $\overline{=}$				
Input impedance	20 k Ω	20 k Ω	600 Ω	600 Ω	20 k Ω
Input sensitivity	316 mV to 3,16 V	316 mV to 3,16 V	3 V	3,2 V	316 mV to 3,16 V
Reception sensitivity (tuner)	-	2 μ V	-	-	-
Maximum consumption	160 mA	180 mA	115 mA	115 mA	115 mA

* UA: Height Units. UP: Width Units.

Centralised power processor modules for 19" rack

1306.1
Power stage adapter with message override relay

- Adapter for output power stages to connect external amplifiers to the sound installation.
- Front LEDs to indicate the status of the audio output (yellow), setup (red), and ON/OFF status (green).
- Front setup pushbutton.
- 2 Rear terminals for 230 V~ mains connection driven by built-in relay.
- 14-Way ribbon wire socket for connection to audio transmission bus.
- Rear 14-way flat cable strap and female connector.
- Rear plug-in strip with 9 terminals.
- Rear cable with 15 V \equiv power connector.
- Rear XLR audio output connector for balanced connection to an output power stage.
- Rear potentiometer for signal adjustment.
- Rear terminal strip for driving of message override in 100 V lines with attenuators.
- It can be controlled through the 0801 software, 1202 console or 1206 digital keyboard.

Features

Centralised amplifier for 1 zone with high impedance loudspeakers designed for installations of up to 127 zones, with or without message broadcast in large commercial installations such as shopping centres, business centres, etc.

1318
Relay commutation switch (message override commutation switch for 3 zones)

- Relay commutation switch for 3 zones with 3 wire installations: it allows an emergency message to be broadcasted through the 100 V loudspeaker lines regardless of the state of the line potentiometers.
- Message override.
- Front LEDs to indicate that relays 1, 2 and 3 are activated (green), power status (green), and setup status (red).
- Front setup pushbutton.
- 14-Way ribbon wire socket for connection to audio transmission bus.
- Rear 14-way flat cable strap and female connector.
- Rear plug-in strip with 21 terminals.
- It can be controlled through the 0801 software, 1202 console or 1206 digital keyboard.

1303.1
2-Zone (5 + 5 W) / 10 W mono amplifier with digital control

- Modular amplifier for 2 zones, (5 + 5 W) / 10 W mono.
- Front LEDs to indicate the status of the audio outputs 1, and 2 (yellow), setup (red), and ON/OFF (green).
- Front setup pushbutton.
- 14-Way ribbon wire socket for connection to audio transmission bus.
- Rear 14-way flat cable strap and female connector.
- Rear plug-in strip with 8 terminals.
- Rear cable with 15 V \equiv power connector.
- It can be controlled through the 0801 software, 1202 console or 1206 digital keyboard.

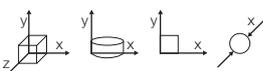

1304.1
1-Zone (10 + 10 W) / 20 W mono amplifier with digital control

- Modular amplifier for 1 zone. (10 + 10 W) / 20 W mono.
- Front LEDs to indicate the status of the audio output (yellow), setup (red), and ON/OFF (green).
- Front setup pushbutton.
- 14-Way ribbon wire socket for connection to audio transmission bus.
- Rear 14-way flat cable strap and female connector.
- Rear plug-in strip with 9 terminals.
- Rear cable with 15 V \equiv power connector.
- It can be controlled through the 0801 software, 1202 console or 1206 digital keyboard.

Technical specifications	1306.1	1303.1	1304.1
Power supply	15 V \equiv	15 V \equiv	15 V \equiv
Input impedance RMS	-	10 W + 10 W	20 W
Input sensitivity	600 Ω	8 Ω	4 Ω

(through isolation transformer)

* UA: Height Units. UP: Width Units.

Centralised power processor modules for 19" rack

1305.1

1-Zone amplifier, 40 W and 100 V output with digital control

- Modular amplifier for 1 zone, 40 W mono with 100 V line output.
- 230 V~ front switch.
- Front LEDs to indicate the status of the audio output (yellow), setup (red), and ON/OFF (green).
- Front setup pushbutton.
- Rear flat cable connector for MILLENIUM bus.
- Rear flat cable strap for interconnecting to MILLENIUM bus.
- It can be controlled through the 0801 software, 1202 console or 1206 digital keyboard.
- IEC 230 V~ rear input.

1319

120 W 1-Zone amplifier and high impedance output (100 V).

Local digital control through 1206 keyboard

- Front switch button to 230 V~.
- Front LEDs to indicate the status of the audio output (yellow), setup (red), and ON/OFF (green).
- Red LED to indicate an error condition
- Front setup pushbutton.
- Rear flat cable connector for MILLENIUM bus.
- Rear flat cable strap for interconnecting to MILLENIUM bus.
- Rear plug-in terminal blocks to connect loudspeakers and accessories.
- It can be controlled through the 0801 software, 1202 console or 1206 digital keyboard.
- IEC 230 V~ rear input.

1320

240 W 1-Zone amplifier and high impedance output (100 V).

Local digital control through 1206 keyboard

- Front switch button to 230 V~.
- Front LEDs to indicate the status of the audio output (yellow), setup (red), and ON/OFF (green).
- Red LED to indicate an error condition
- Front setup pushbutton.
- Rear flat cable connector for MILLENIUM bus.
- Rear flat cable strap for interconnecting to MILLENIUM bus.
- Rear plug-in terminal blocks to connect loudspeakers and accessories.
- It can be controlled through the 0801 software, 1202 console or 1206 digital keyboard.
- IEC 230 V~ rear input.

Features

Centralised amplifier for 1 zone with high impedance loudspeakers designed for installations of up to 127 zones, with or without message broadcast in large commercial installations such as shopping centres, business centres, etc.

Amplifiers and power supply units

1307.1 15 V $\overline{\text{---}}$, 20 W Power supply unit

- 15 V $\overline{\text{---}}$, 20 W Power supply unit with short-circuit and reverse polarity protections.
- Powered by local connection to 230 V \sim .
- It can be parallel-connected to other units (it allows up to 3 units).

Features

Additional power supply module for all types of installations.

1308.1 15 V $\overline{\text{---}}$, 20 W Buffer-power supply unit

- 15 V $\overline{\text{---}}$, 20 W Power supply unit with short-circuit and reverse polarity protection.
- It can be parallel-connected to other units.
- With buffer for 5 audio channels to reduce cable sections.
- Powered by local connection to 230 V \sim .
- Digital addressing to drive a zone in a Millennium installation

Features

Power supply module for hotel floors or similar installations.

1309.1 20 W Amplifier

- 20 W (4 Ω) / 10 + 10 W (2 Ω) Amplifier.
- With 3 mixed audio inputs, plus a fourth input with priority over the others.
- Powered by local connection to 230 V \sim

Features

Amplifier module to increase the power in any area.

1310.1 20 W Digital amplifier

- 20 W (4 Ω) / 10 + 10 W (2 Ω) Digital amplifier.
- With 3 mixed auxiliary audio inputs with priority over music plus a fourth input with priority over the others and over music.
- It can be controlled from the 1202 control console, from 1206.xx keyboards or by means of standard electric pushbuttons.
- Powered by local connection to 230 V \sim .
- Digital addressing to drive a zone in a Millennium installation.

Features

Control and amplification module for installations of more than 3 zones. Suitable for classrooms, meeting rooms, offices, workshops, etc. It also allows up to 3 control keyboards to be parallel connected.

Control units

1205.12

Compatible with switchgear units from any manufacturer

1205.10

1205.12 / 1205.10

4-Channel control unit. 1 W RMS, 1-2 loudspeakers.

- 4-Channel control unit. 1 W RMS power to connect 1 or 2 loudspeakers, always with 1308.1 buffer-power supply unit.
- Digital volume in 32 dB steps. If required, the volume will drop gradually after 6 hours of operation until it switches off (hotels).
- Message override.

Technical specifications

Power supply 15 V $\overline{=}$ through general line

Maximum consumption 3 W

RMS power output 1,5 W

Minimum load impedance 16 Ω per output

Features

Control and local amplification of sound in hotel rooms, residences/homes for the elderly, offices and, in general, places in which not much sound power is required.

Related products

- Accessories for standard box (\varnothing 60 mm). EGi 1-gang front trims. Please consult page 30.

1206.12

Compatible with switchgear units from any manufacturer

1206.10

1206.12 / 1206.10

Digital control keyboard

- Digital control keyboard with 4 audio channel selector.
- Pilot lamp to indicate which channel has been selected.
- To be used with EGi digital amplifiers.
- Up to 3 pieces can be parallel-connected in the same zone.

Technical specifications

Maximum consumption 1,2 W

Features

Local sound control in installations of up to 4 channels with message broadcast emitted by zones, in combination with any digital amplifier.

Related products

- Accessories for standard box (\varnothing 60 mm). EGi 1-gang front trims. Please consult page 30.

1207.12

Compatible with switchgear units from any manufacturer

1207.10

1207.12 / 1207.10

4-Channel control unit. 2 W RMS, 1-4 loudspeakers
Message override

- 4-Channel control unit. 2 W RMS power to connect from 1 to 4 loudspeakers, always with 1308.1 buffer-power supply unit.
- Digital volume in 80 dB steps. If required, the volume will drop gradually after 6 hours of operation until it switches off (hotels).
- It can store a zone number.
- Message override.
- It can be controlled through the 0801 software or 1202 console.

Technical specifications

Power supply 15 V $\overline{=}$ through general line

Maximum consumption 5,1 W

RMS power output 2 W

Minimum load impedance 8 Ω

Features

Local sound control in installations of up to 4 channels with message broadcast emitted by zones.

1209.12 / 1209.10

2-Zone control unit for hotels (messages and TV connection)

- 2-Zone mono control unit. 1 + 1 W .
- It enables to assign one zone to TV audio + messages and the other zone to messages only.
- On / Off key.
- Digital volume regulator.

Technical specifications

Power supply 15 V_{AC} through general line

Maximum consumption 3,5 W

RMS power output 1 W + 1 W

Minimum load impedance 16 Ω

Features

This control unit has been designed for hotels. It allows to listen to the TV audio in the bathroom, as well as messages.

1208.12

1208.10

Compatible with switchgear units from any manufacturer

1208.12 / 1208.10

2-Zone intercom unit for star configuration systems.

- Intercom unit, 2 zones with independent volume adjustment by zone.
- Selection between internal or external microphone.
- Allows the parallel connection of several 1208.xx units to the same input.

Technical specifications

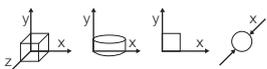

Power supply 15 V_{AC} through general line

Maximum consumption 3 W

Minimum load impedance 250 Ω

Features

Broadcasting of messages with selection of 2 possible zones. Especially recommended for surgeries, health centres, etc.

1106.12 / 1106.10

Volume regulator and auxiliary input.

- Volume regulator, with auxiliary input for local audio sources (CD, cassette deck, ...) with ON switch and LED indicator.
- It includes slow signal compressor to prevent distortion.
- Self-mixing for up to 5 units.

Technical specifications

Power supply 15 V $\overline{\text{---}}$ through general line
 Maximum consumption 2,43 W
 RMS power output 1,25 W
 Minimum load impedance 16 Ω
 Input impedance 20 k Ω
 Input sensitivity 1,9 V

Features

Local connection of music sources in assembly halls, classrooms, etc. for any installation.

1106.12

1106.10

Compatible with switchgear units from any manufacturer

Related products

- Electric pushbuttons to digital amplifiers adapter.
- Auxiliary module for installation in aggressive environments.

1510

1510 General line bus to flat cable converter

- It converts the general line into flat cable, allowing the interconnection of Millennium modules.
- It must be used when installing another 19" rack system far away from the main rack or when exceeding flat cable consumption limits.

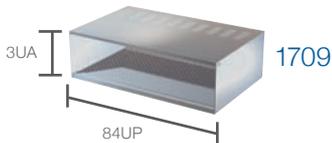

1509

1509 XLR Output and audio signal adjustment (from 0,067 Vrms to 2,7 Vrms)

- It allows to select one of the five signals that run through the general line (4 audio channels and messages) and provides electrical isolation with a 1:1 audio transformer that allows the use of other device.
- It is used to receive and send an audio program to the telephone switchboard as waiting music.
- The connection between the output and the audio input on the receiver must be done with a shielded audio cable.
- It allows to receive and send messages through 1318 module.

Industrial public address systems

EGi distributes 100 V line public address systems for **indoor and outdoor medium-size to large installations**. This systems are suitable for sport centres, shopping centres, schools or city halls due to their easy use and installation.

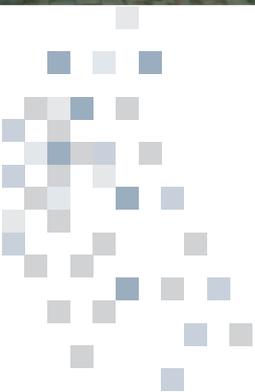

EGi provides project consulting and technical support in order to give custom-made solutions and fit customers' needs.

Products

- Voice Evacuation System (VES) compliant with the IEC60849 standards
- Conference systems with or without voting
- Digital sound systems and message broadcast with self-diagnostic routines
- Amplifiers
- Audio sources, mixer amplifiers and equalizers
- Wireless, hand-held, table and floor stand microphones

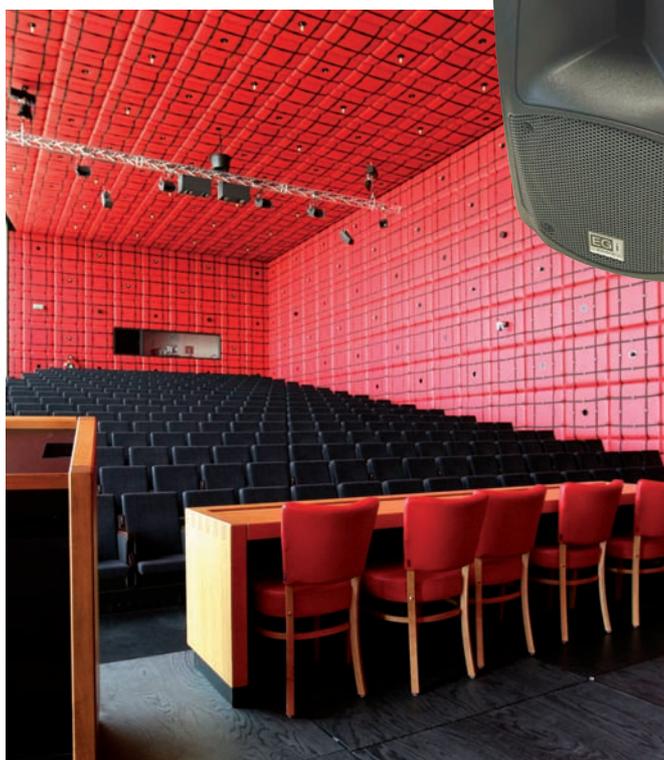

High
performance
and a remarkable
sound quality

(((escenic)))

Escenic is the right product to enable the sound broadcast in those places where the demanded audio power is higher than the level supplied in conventional background music. This is ensured by upgrading our quality standards in speaker design to the requirements of the Pro-Audio field.

On the other hand, the products of series “**Escenic**” can also be used as an extension of “**Millennium**” and / or “**PASO**” projects. In that case, the “**Escenic**” range is ideal to provide an excellent sound performance and a high efficiency, maintaining at the same time the range of functions of the general system, like message override, pre-recorded message broadcast, etc.

Features

- Sound systems where the level of required audio power is higher than in background sound installations.
- Possibility to broadcast stereo sound at high power levels.
- Mixing and equalisation equipment for live performances and recording studios.
- Outdoor and Indoor, heavy duty speakers for stage and monitor use.
- With a range of accessories and mounting supports for every environment.

Output power stages

A range of power boosters where a clean and transparent sound meets the maximum output performance.

The main features of the Escenic power boosters are:

- Forced low-noise ventilation
- Solid 2 mm steel housing
- Double simetric input/output XLR (Cannon) / Jack 6.3 mm
- Toroidal power supply transformer
- Clip indicators
- Independent front volume controls for each channel
- Modular building for easy maintenance
- Protection for speakers by means of sub-sonic filter
- Distortion filter.

6203

Stereo graphic equaliser, 15 bands, 2/3 octave

6204

Stereo digital sound efect generator

6205

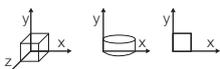

Automatic feedback destroyer (made by Behringer)

6301

Output power stage, 2 x 225 W @ 4 Ω

- Stereo power boosting module. Easy to handle. Designed and sized under safe parameters for long resistance.
- Protected against short-circuits, too low impedance in the speaker line, overheating and continuous clip.
- Variable speed fan.
- LED indicators showing presence of signal.
- Gain adjustment for each channel.
- To be installed in 19" wide rack. 2UA (height units). 84UP (width units).

6302

Output power stage, 2 x 450 W @ 4 Ω

- Designed and sized under safe parameters for long resistance.
- Bridgeable power stage, 2 x 450 W or 1 x 850 W
- Protected against short-circuits and too low impedance in the speaker line. Independent temperature sensors for each channel.
- Modular technology: Each channel is built in one module that includes the whole of its electronic components and is easily interchangeable and very compact.
- LED indicators showing correct operation and safe condition.
- The input module has selectors for operation mode, operational limits and a filter for low frequencies.
- Gain adjustment for each channel.
- To be installed in 19" wide rack. 2UA (height units). 84UP (width units).

6303

Output power stage, 2 x 650 W @ 4 Ω

- Designed and sized under safe parameters for long resistance.
- Bridgeable power stage, 2 x 450 W or 1 x 850 W
- Protected against short-circuits and too low impedance in the speaker line. Independent temperature sensors for each channel.
- Modular technology: Each channel is built in one module that includes the whole of its electronic components and is easily interchangeable and very compact.
- It can drive 100 V line in bridged mode.
- LED indicators showing correct operation and safe condition.
- The input module has selectors for operation mode, operational limits and a filter for low frequencies.
- Gain adjustment for each channel.
- To be installed in 19" wide rack. 2UA (height units). 84UP (width units).

Mixing tables

Two different mixing tables that can fully comply with the requirements of the most usual installations described in this catalogue.

The first of them (EGi 6201) can solve, at a reduced cost, installations where up to two music sources must be mixed with the voice of a disc-jockey / speaker / preacher, etc. To be frequently used in bars, pubs, small-sized discos, recreational areas of hotels and shopping malls, small-sized sport halls, and, in general, in every broadcast to the public where the voice of the speaker has to be mixed with the background music.

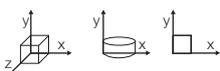

The second proposed mixing table (EGi 6202) offers a highly professional performance and it is strongly recommended in those places or events where up to sixteen channels (MIC or AUX) have to be mixed.

6201

Mixing table 2 + 1 channels for disc jockeys.
Dimensions 235 x 356 x 69 mm

- Stereo 3-channel mixer (2 channels + DJ Microphone).
- DJ microphone input with talkover and tone controls for bass / medium / treble (-24 dB / +12 dB).
- The two channels have 3 inputs each: (phono / CD / line) and tone controls for bass / medium / treble (-24 dB / +12 dB).
- Monitoring option for both channels and REC and headphone outputs.
- Independent "Master" volume controls. "Punch" push buttons and beat indicating LEDs.

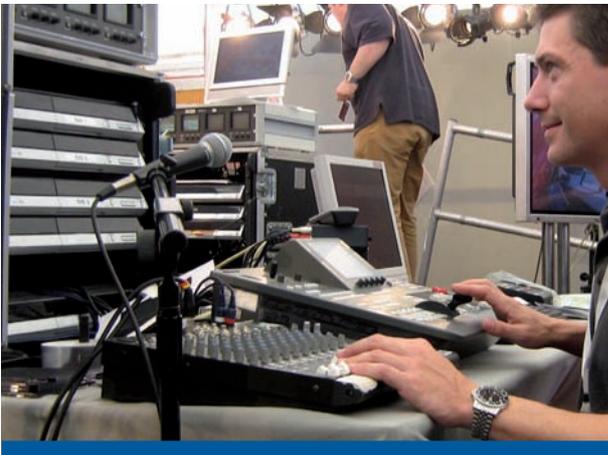

6202

16-Channel mixing table for MIC / INST
Dimensions 416,4 x 423 x 108 mm

- 16 Input channels. 8 mono inputs MIC / LINE and 4 stereo LINE inputs (of which two can be used as mono MIC inputs).
- 10 low noise, high precision Pre-amplifiers. High performance pre-amplifiers that will get the best from any dynamic or condenser microphone.
- Phantom power supply. All 10 pre-amps have selectable phantom power supply to feed condenser microphones. A single switch turns On/Off the phantom power supply of all 10 channels.
- I/O Insertion: The mono input channels are equipped with I/O insertion points to add compressors, equalisers or any external signal processing device.
- 4 Audio Buses (Stereo & Group). Besides the main stereo bus, the mixing table has a stereo group bus and outputs that can be used for a convenient channel grouping.
- Three-band channel equaliser and high-pass filter. One three-channel equaliser is available for each input channel. All the mono MIC input channels have also a selectable high-pass filter to suppress the undesired low frequency noise.
- Two auxiliary sends and one auxiliary stereo return. Two auxiliary sends to each channel (one post-fader and one selectable between pre- or post-fader) result in an excellent flexibility for external signal processing or monitoring. An auxiliary stereo return is also available.
- Illuminated switches. The activation switches (stereo bus assignment, pre-fader listening and phantom power supply) are illuminated for a quick confirmation of the critical adjustments.
- Supplied with adapters for rack assembly.

Microphones

For an optimal performance of the “Escenic” systems where speech broadcast is required, we propose hereon a selection of the most suitable EGi-PASO microphones that will solve the most frequent applications.

With the wireless receivers, the preferred microphone (hand-held, headworn, lavalier...) has to be selected. Some of them are also available in kit format for an easier system configuration.

For this purposes, please ask our technical assistance service.

M936

Cardioid dynamic microphone for speech

Active Cabinet Loudspeakers

The range of active cabinet loudspeakers offers the best solution for portable systems: parties, conferences, weddings and all kind of events where an easy to handle, good quality sound system is required that allows the connection and control of several audio sources without any external mixer.

The EGi active cabinet loudspeakers provide always a correct and efficient solution to broadcast sound under the principles of flexibility and liability, even in front of exceptional or extreme acoustical conditions.

Just plug them into the mains, press the ON switch, and plug in the mic or music source (CD, Tape, Soundcard...). The line inputs have independent level controllers to mix multiple sound signals.

6606.AP

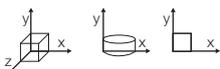

Active cabinet loudspeaker. Features: 8", 2 ways, 200 W RMS
Dimensions 300 x 450 x 300 mm

- Built-in 8" woofer and 1" titanium engine.
- External mixer not required.
- Mic and line inputs with adjustable gain.
- Master, line and mic volume controls.
- Designed for vertical use, on a floor stand or hung.
- Several units can be linked to each other.

Technical specifications

6606.AP

RMS power	200 W
Type	Active
Woofer	8" - 150 W
Tweeter	1" - 50 W
Frequency response (@ - 6 dB _{SPL})	52 - 19.000 Hz
Sensitivity (@ 1 W, 1 m)	120 dB _{SPL}
Coverage angle (@ 4 KHz)	H 110°, V 100°
Type of cabinet	Bass Reflex

Floor stand for 6603.08, 6603.IP, 6604.08, 6604.IP and 6605.AP

6706
Wall support for 6606.AP.

Passive cabinet loudspeakers

Medium power

Compact, multi-purpose monitor speakers, designed to fulfill every kind of requirements in sound distribution for every environment. Their brilliant frequency response make them ideal for those surroundings where not only speech, but also a loud, powerful and clear music is going to be broadcasted. They are easy to install thanks to their range of wall and ceiling supports. The different versions of indoor and outdoor performance make them virtually suitable for any surrounding.

6601.08 / 6601.IP
Passive cabinet loudspeaker. Features: 8", 2 ways, 8 Ω, 100 W RMS. Dimensions 270 x 440 x 230 mm

- 2-Way passive system.
- Cardioid directionality.
- Highly resistant polypropilene housing.
- Front metallic protection grille.
- For vertical or horizontal use.
- Colour: black.
- Only 6601.IP features IP-54 degree for outdoor use.
- Hi-Fi Response.

6602.100 / 6602.IP
Passive cabinet loudspeaker. Features: 8", 2 ways. 60 W RMS with 100/70/50 V line transformer. Dimensions 270 x 440 x 230 mm

- Same features as 6601.08, with line transformer. Selectable voltage and power by means of rotary potentiometer. Only one connection required.
- Highly resistant polypropilene housing.
- Front metallic protection grille.
- For vertical or horizontal use.
- Colour: black.
- Only 6602.IP features IP-54 degree for outdoor use.
- Selectable power between: 60 W, 30 W, 15 W, 7,5 W or 3,7 W
- Selectable voltage between 50 V, 70 V or 100 V

High power

Design, functionality and a high fidelity sound are combined in these speakers, equipped with titanium compression engine domes. Their attractive and compact polypropilene housing is remarkably reliable and is designed for an intense and prolonged use. The available accessories make these speakers easy to install and to transport. The cabinets are designed for vertical, horizontal use, standing or hung.

6603.08 / 6603.IP

Passive cabinet speaker. Features: 12", 2 ways, 8 Ω, 300 W RMS. Dimensions 400 x 580 x 310 mm

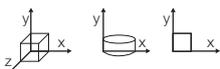

- 2-Way passive system.
- 12" woofer and 1" titanium compression engine.
- Heavy duty polypropilene housing.
- Front metallic protection grille.
- For vertical or horizontal use.
- Colour: black.
- Only 6603.IP features IP-54 degree for outdoor use.

6604.08 / 6604.IP

Passive cabinet speaker. Features: 15", 2 ways, 8 Ω, 350 W RMS. Dimensions 450 x 700 x 360 mm

- 2-Way passive system.
- 15" woofer and 1" titanium compression engine.
- Heavy duty polypropilene housing.
- Front metallic protection grille, with extra protection in the weakest part.
- For vertical use, standing or hung.
- Colour: black.
- Only 6604.IP features IP-54 protection degree for outdoor use.

LOUDSPEAKERS

EGi offers you a wide range of loudspeakers and sound diffusers.

EGi loudspeakers and passive diffusers can be combined with the **Domos** and **Millennium** series. They produce an excellent sound quality, both in domestic environments and in public or commercial installations.

EGi offers excellent alternatives for wall or ceiling, flush or surface mounting with sizes from 60 x 60 mm to 27 x 27 cm and options of 2", 3", 5" and 8" with three different qualities (standard, wideband and Hi-Fi), as well as different versions of baffles and cabinets to obtain the best sound performance.

And on the other hand, under its **EGi-Paso** trademark, **EGi** also offers an excellent range of projectors, sound columns, horns, megaphones, ceiling and wall loudspeakers, baffles and self-amplified diffusers, with options for indoor and outdoor, anti-damp, metallic, polypropylene... Specially designed for installation in **EGi-Paso** 100 V line public address systems.

Loudspeaker Series

- **EGi low impedance loudspeakers**

2" Loudspeakers, accessories for 2" loudspeakers, 3" loudspeakers, accessories for 3" loudspeakers, 5" loudspeakers, accessories for 5" loudspeakers, 5" wall-mount loudspeakers, accessories for 5" wall-mount loudspeakers, 8" loudspeakers, accessories for 8" loudspeakers, Hi-Fi baffles, accessories for Hi-Fi baffles, sound projectors

- **EGi-Paso 100 V line loudspeakers**

Wall loudspeakers, ceiling loudspeakers, accessories for ceiling loudspeakers, sound projectors, 100 V baffles, columns, horns, baffles for 100 V and low impedance

- **Sound and lighting, all in one device**

2" loudspeakers

Decoration concerns are increasingly important in architecture related installations nowadays. The best way to ensure that loudspeakers blend into their surroundings is to reduce their size. EGi has specially developed loudspeakers of just 2" and 3", maintaining a surprising sound quality considering their dimensions.

Frequency response	128 - 12.800 Hz	

100 V Line loudspeakers

Ceiling loudspeakers

G11B/T6

8" Ceiling loudspeaker. 100 V line (1, 3, 6 W).

Flush-mounting box ref V17B and grille ref 0603.10 are not included

G14A/T6

5" Ceiling loudspeaker. 100 V line (1, 3, 6 W). High performance.

Flush-mounting box ref V17B and grille ref 0603.10 are not included

06021

5" Standard loudspeaker. 6 W. High performance.

Metallic grille supplied. White ring and fixing brackets to fix the loudspeaker into the ceiling included.

Technical specifications	G11B/T6	G14A/T6	06021
Dimensions (X x Y x Z)	230 x 230 x 140 mm	148 x 148 x 110 mm	196 x 196 x 80 mm

Sound & Lighting

Flush-mounting

70001 · 70002
70003 · 70004

Sonylux is a two-in-one concept that allows the innovative integration of Hi-Fi sound and lighting in only one device, improving the overall look of the ceiling and reducing installation time and costs for public or private use.

70001

Light fitting for fluorescent lamp 2 x 26 W, with built-in 10W, 16 W loudspeaker

70002

Light fitting for fluorescent lamp 2 x 26 W, with built-in 10W, 100V loudspeaker

70003

Light fitting for fluorescent lamp 2 x 26W, with built-in 10W active loudspeaker

70004

Light fitting for fluorescent lamp 2 x 26W, with built-in 10W active loudspeaker

Technical specifications

Power consumed by the light fitting	2 x 26 W
Sound power	10 W (RMS)
Audio input	16 Ω, 100 V or autoamplified @ 48 V $\overline{-}$
Sound pressure level @ (1 W / 1 m)	85,2 dB _{SPL}
Maximum sound pressure level (10 W / 1 m)	95 dB _{SPL}
Coverage angle	-6 dB@ 20° 8 KHz; 25° 4 KHz; 30° 2 KHz
Maximum ambient temperature for a correct operation	55°C

Surface mounting

70005

Round ceiling sound projector designed for surface mounting, 16 Ω 2 W

70006

Round ceiling light projector designed for surface mounting, 50 W

70007

Round ceiling sound projector designed for surface mounting with movable baseplate, 16 Ω 2 W

70008

Round ceiling light projector designed for surface mounting with movable baseplate, 50 W

70009

Square ceiling sound projector for surface mounting, 16 Ω 2 W

70010

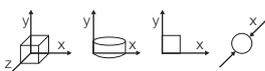

Square ceiling light projector for surface mounting, 50 W

70011

Square ceiling sound projector for surface mounting with movable baseplate, 16 Ω 2 W

70012

Square ceiling light projector for surface mounting with movable baseplate, 50 W

Surface mounting

70013

70013 / 70014

16 Ω Round ceiling sound projector (2 W) and lamp (50 W) for wall mounting

Technical specifications

Lampholder GU10
 Lamp type Fluorescent 2 x 26 W
 Nominal power (audio) 2W (RMS)
 Impedance 16 Ω
 Sensitivity 85,2 dB_{SPL}
 Maximum power 95 dB_{SPL}
 Dimensions (X x Y x Z) 70 x 285 x 100 mm

70015 / 70016

2" Loudspeaker for Ø 50 mm luminaires. 20 Ω, 4 W. Colour: white or chrome

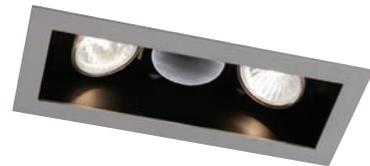

Technical specifications

Sensitivity (@ 1W, 1m) 85 dB_{SPL} +/- 1.5 dB_{SPL}
 Frequency response (@ -6dB) 250 - 17.000Hz
 Impedance 20Ω, +/- 15%
 Resonance frequency 250Hz, +/- 15%
 Power 4 W (RMS)
 Dimensions Ø 50mm x 27mm (height)
 Negative/positive terminal strip included

Examples of installations

702XA Light fitting + 1 pc. GU5.3 lamp
 + 1 pc. 70015 or 70016 loudspaeaker

703XA Light fitting + 2 pcs. GU5.3 lamp
 + 1 pc. 70015 or 70016 loudspaeaker

70017

4" Loudspeaker for luminaires with G53 HMG-111 lamps. 20 Ω, 7 W

Technical specifications

Sensitivity (@ 1W, 1m in the axis) 85 dB_{SPL} +/- 1.5 dB_{SPL}
 Frequency response (@ -6dB) 230 - 18.000 Hz
 Impedance 20Ω, +/- 15%
 Power 7 W (RMS)
 Dimensions Ø 110,05 mm x 85 mm (height)
 Security towline for easier installation included

Examples of installations

3724 Light fitting 2 pcs. G-53 lamp
 +2 pcs. 70017 loudspeaker

3741 Light fitting + 1 pc.
 70017 loudspeaker

3743 Light fitting +2 pcs. G-53
 lamp +1 pc. 70017 loudspeaker

37111 Light fitting
 + 1 pc. 70017
 loudspeaker
